Actor-Network Theory in Education - Tara Fenwick 2010-07-02

Actor-Network Theory (ANT) has enjoyed wide uptake in the social sciences in the past three decades, particularly in science and technology studies, and is increasingly attracting the attention of educational researchers. ANT studies bring to the fore the material - objects of all kinds - and de-centre the human and the social in educational issues. ANT sensibilities are interested in the ways human and non-human elements become interwoven. Since its first introduction, actor-network theory has undergone significant shifts and evolutions

and as a result, it is not considered to be a single or coherent theoretical domain, but as developing diversely in response to various challenges. This book offers an introduction to Actor-Network Theory for educators to consider in three ways. One mode is the introduction of concepts, approaches and debates around Actor-Network Theory as a research approach in education. A second mode showcases educational studies that have employed ANT approaches in classrooms, workplaces and community settings, drawn from the UK, USA, Canada, Europe and Australia. These demonstrate how ANT can operate in highly diverse ways whether it focuses on policy critique, curriculum inquiry, engagements with digital media, change and innovation, issues of accountability, or exploring how knowledge unfolds and becomes materialized in various settings. A third mode looks at recent 'after-ANT' inquiries which open an array of

important new approaches. Across these diverse environments and uptakes, the authors trace how learning and practice emerge, show what scales are at play, and demonstrate what this means for educational possibilities.

The Iron Age I Structure on Mt. Ebal - Ralph K. Hawkins
2012

In Josh 8:30-35, Israel constructs an altar on Mt. Ebal in fulfillment of the command of Deut 27:1-8. This structure had very important social, political, and religious implications for Israel, for it was the first structure to be built after the people entered the land of Canaan. Once the altar was completed, sacrifices were to be offered on it, and a renewal of the covenant was to be carried out (patterned after the ritual of Deut 31:9-13). This covenant renewal was necessary to integrate the people into the covenant who had not been a part of the Sinai experience. The event was significant enough to establish nearby Shechem as the tribal league shrine, and it was the

first political and religious ceremony that the Israelites undertook following their entry into the land. As a covenant ratification, it could be described as their ratification as a nation. The altar on Mt. Ebal and its concomitant ceremony were, therefore, according to the claims of the Hebrew Bible, of supreme importance in the life of ancient Israel. In 1980, during the survey of the territory of Manasseh, Israeli archaeologist Adam Zertal discovered a site on Mt. Ebal dating to the period of Iron I, during which the Israelites began to sedentarize in the central hill country of Canaan. The site was excavated over eight seasons, from 1982 to 1989, under the auspices of the University of Haifa and the Israel Exploration Society. In 1985, Zertal published an article in which he suggested that the structure on Ebal may have been the altar of Josh 8:30-35. In *The Iron Age I Structure on Mt. Ebal*, Ralph Hawkins reviews the excavation on Mt. Ebal and its

results, including the scarabs, seals, and animal bones found there. He examines the architecture of the site in relation to Mesopotamian watchtowers, altars, and the descriptions of altars in mishnaic materials, Ezekiel, and Deuteronomic passages. This fascinating book examines the Mt. Ebal site using a comparative method for both the physical data and the textual data. The site and its artifacts are analyzed and then compared with alternative proposals and literary traditions. The site is placed in its broader regional context in order to determine how it might relate to the larger settlement picture of Iron Age I. The primary purpose is to examine the data with a view to determining the nature and function of the site and its possible relation to Josh 8:30-35. A compelling read for biblical and archaeological students and scholars, who will better be able to envision sites of past events.

Saber-tooth Curriculum - J. Abner Peddiwell 1939

"A classic of educational criticism proves its relevance in light of today's educational quandaries First published by McGraw-Hill in 1939, The Saber-Tooth Curriculum was a groundbreaking satire of the educational establishment, and its unwillingness to adapt to changing times. Throughout the decades, this witty work has not only become an educational classic, but has also remained as relevant and applicable to the key questions in education today as it was when first published. With tongue firmly in cheek, Peddiwell takes on the conflicting philosophies of education, from its imagined origins at the dawn of time to its culmination in a ritualistic,

deeply entrenched social institution with rigidly prescribed norms and procedures. Developed within a fanciful framework of fictional lectures, given by fictional author Professor J. Abner Peddiwell, doyen in the History of Education at Petaluma State College, this humorous fable illustrates the progress of education and gives valuable insights into how it could continue to develop in the decades to come."--desc. of new 2004 ed., via amazon.ca.

Building the Agile Enterprise - Fred A. Cummins 2010-07-28

In the last ten years IT has brought fundamental changes to the way the world works. Not only has it increased the speed of operations and communications, but it has also undermined basic assumptions of traditional business models and increased the number of variables. Today, the survival of major corporations is

challenged by a world-wide marketplace, international operations, outsourcing, global communities, a changing workforce, security threats, business continuity, web visibility, and customer expectations. Enterprises must constantly adapt or they will be unable to compete. Fred Cummins, an EDS Fellow, presents IT as a key enabler of the agile enterprise. He demonstrates how the convergence of key technologies—including SOA, BPM and emerging enterprise and data models—can be harnessed to transform the enterprise. Cummins mines his 25 years experience to provide IT leaders, as well as enterprise architects and management consultants, with the critical information, skills, and insights they need to partner with management and redesign the enterprise for continuous change. No other book puts IT at the center of this transformation, nor integrates these technologies for this purpose. Shows how to integrate and deploy critical

technologies to foster agility
Details how to design an enterprise architecture that takes full advantage of SOA, BPM, business rules, enterprise information management, business models, and governance
Outlines IT's critical mission in providing an integration infrastructure and key services, while optimizing technology adoption throughout the enterprise
Illustrates concepts with examples and cases from large and small commercial enterprises
Shows how to create systems that recognize and respond to the need for change
Identifies the unique security issues that arise with SOA and shows how to deploy a framework of technologies and processes that address them

Information Technology Control and Audit, Fifth Edition
- Angel R. Otero 2018-07-27

The new fifth edition of *Information Technology Control and Audit* has been significantly revised to include a comprehensive overview of the IT environment, including revolutionizing technologies, legislation, audit process, governance, strategy, and outsourcing, among others. This new edition also outlines common IT audit risks, procedures, and involvement associated with major IT audit areas. It further provides cases featuring practical IT audit scenarios, as well as sample documentation to design and perform actual IT audit work. Filled with up-to-date audit concepts, tools, techniques, and references for further reading, this revised edition promotes the mastery of concepts, as well as the

effective implementation and assessment of IT controls by organizations and auditors. For instructors and lecturers there are an instructor's manual, sample syllabi and course schedules, PowerPoint lecture slides, and test questions. For students there are flashcards to test their knowledge of key terms and recommended further readings. Go to <http://routledgegettextbooks.com/textbooks/9781498752282/> for more information.

Immunohistochemical Expression - Rosario

Caltabiano 2021-09-02

Immunohistochemistry (IHC) is an ancillary method, widely used in pathologists' practice, that allows identifying

diagnostic and prognostic/predictive of therapeutic response protein markers on tissue samples by the use of specific monoclonal antibodies and chromogenic substances that guarantee the visualization of an antibody-antigen binding complex under a light microscope [1]. Coon et al., in 1941 [2], first introduced the use of fluorochrome-conjugated antibodies in clinical practice. Since then, IHC has gone from being a useful tool for identifying the differentiation line of otherwise undifferentiated cells to a technique capable of providing not only diagnostic but also prognostic and predictive indications of responses to specific therapeutic options [1,3]. The abovementioned peculiarities have made IHC one of the most used ancillary methods in the histopathological approach to human neoplastic and non-neoplastic diseases [3-5]. This Special Issue contains 11 accepted papers that provide readers with a comprehensive

update on current and future applications of IHC in medical practice.

The Story Machine - Tom McLaughlin 2015-01-15

Elliott is a boy who likes to find things and, one day, he stumbles across a machine. At first, he can't work out what the machine is for - it doesn't beep or buzz like all his other machines and it doesn't have an ON/OFF button. Then, quite by accident, Elliott makes the machine work. The machine makes letters! Elliott thinks it must be a story machine but, sadly, Elliott isn't very good at letters and words. How can he make magical stories without them? But, wait, some of the letters look like pictures. Elliott is good at pictures and, as he discovers, pictures make stories. An inspiring, uplifting picture book about the simple joys of a typewriter in a world of hi-tech machines. Perfect for fans of Oliver Jeffers.

Soil salinization and sodication

have been identified as major

Survivors - David Long 2016-10-25

Winner of the Best Book With Facts Blue Peter Book Award 2017. Amazing real-life stories about extreme survival. Beautifully presented in a

large, paperback format, and fully illustrated in colour throughout, this wonderful anthology is a treat for all the family. Be shocked and amazed by these incredible real-life stories of extreme survival, including . . . The Man Who Sucked Blood from a Shark, a sailor who survived for 133 days on a raft in the Atlantic when his ship was torpedoed, using shark's blood in place of fresh water. The Girl Who Fell From the Sky, a teenager who fell 2 miles from an aeroplane and trekked through the Amazon jungle to safety. The Woman Who Froze to Death - Yet Lived, a woman who was trapped under freezing water for so long her heart stopped. Four hours later, medics managed to warm her blood enough to revive her. Combining classic tales such as Ernest Shackleton's Antarctic voyage, as well as more modern exploits such as the adventurer who inspired the movie 127 Hours, these astonishing stories will be retold by young readers to all of their friends. Pedagogy and Practice -

Patricia Murphy 2012-06-21

This book foregrounds pedagogy in a way that challenges readers to reflect on themselves as teachers and learners, and to be reflexive about their own practices and contexts. Learning involves a transformation of identity which occurs through negotiation and repositioning, through new ways of relating, and through different ways of participating in practices. This book examines the meaning and implications for pedagogy in educational and workplace settings, and the role of the teacher in this sociocultural view of learning. By illustrating

the mediated nature of agency and identity, the chapters (re)conceptualise the teacher and the learner and show different ways of supporting learning and being a teacher. The settings represented range from nursery to university and from out-of-school to institutionally-based and work place situations. Curricular aspects represented include popular culture, critical literacy, multimodality, the arts, and new technologies. Teachers and student teachers, as learners, are also represented in the accounts assembled. The book takes a sociocultural view of learning and considers the pedagogical implications of this view. It explores different meanings of pedagogy and considers notions of cultural bridging and the process of transforming identities. The contributions challenge ways of thinking about practice, both teaching and assessment, and argue for practices that bridge between learners' worlds, their communities and educational institutions. Drawing on the

international literature, this book will be essential reading for students of curriculum learning and assessment in all sectors from pre-primary to further and higher education. It is suitable as a core text for masters and taught doctorate programmes. It will also be of interest to a wide range of professionals involved with curriculum, learning and the practice of teaching and assessment. This book is relevant to those in work-based and professional education and training, and in informal educational settings, as well as traditional educational institutions at all levels. A unique collection in a field that is underrepresented, it will also be of interest to an academic audience.
