White Mouse - Nancy Wake 2011-12-01

Nancy Wake, nicknamed 'the white mouse' for

her ability to evade capture, tells her own story. As the Gestapo's most wanted person, and one of the most highly decorated servicewomen of the war, it's a story worth telling. After living and working in Paris in the 1930's, Nancy married a wealthy Frenchman and settled in Marseilles. Her idyllic new life was ended by World War II and the invasion of France. Her life shattered, Nancy joined the French resistance and, later, began work with an escape-route network for allied soldiers. Eventually Nancy had to escape from France herself to avoid capture by the Gestapo. In London she trained with the Special Operations Executive as a secret agent and saboteur before parachuting back into France. Nancy became a leading figure in the Maquis of the Auvergne district, in charge of finance and obtaining arms, and helped to forge the Maquis into a superb fighting force. During her lifetime, Nancy Wake was hailed as a legend. Her autobiography recounts her extraordinary wartime experiences in her own words.

The Ultimate Sports Betting Secrets - A. B. Lawal 2019-02-14

Imagine if you had an Almanac with tomorrow's sports results and events? Imagine what you could do if you knew the outcome before it actually happened. Impossible? This book teaches you how sports investing works and how you can win consistently from sports betting. Sports has been my life since childhood. I was trying to crunch the code to predict tomorrow's games. In fact, this may sound a little bit like a back to the future fairytale, but I've come as close as I can to the results of Tomorrow's Almanac. During the last 13 years, I've been gathering sports data for Major League sports like Major League Baseball, NHL Hockey, the NFL football and NBA basketball. I'm crunching the numbers and I'm comparing the stats. I'm analyzing and back testing everything for years and years to crack the sports code and to find those repeating patterns and trends. This makes me understand what makes teams win and what makes teams lose. And you know what I found? I found that history always repeats itself. This is true, especially in sports where the rules are strictly defined. The outcomes in these situations are very predictable. Of course there are lucky strikes and conditions that are impossible to put into perspective. However, those are very small percentages. If you know the past outcome of an event, you can predict the results for the game in similar circumstances with a high degree of probability. As I said before, the past is never a full indication of what will happen in the future and there is always room for surprises, but again, this is what makes sports fun to watch. Am I right? However, what is the chance that a team with similar power and player statistics will produce a similar outcome in a similar game in similar circumstances? What's that percentage? 86.5% that's right. An 86.5% of the cases there will be no surprises and the prediction will come absolutely. The Zcode investing software is the best system in the market because it keeps making investors consistent gains each and every month. Truth is we love sports, but we hate to gamble and that's why we call this sports investing, which is similar to any other trading like stocks, stock options, and forex trades. This is just way more predictable than today's flawed economic models with crisis's and bankruptcy events. Every day the software is gathering thousands

and thousands of sports data and results: every single event, every single detail, every single player and every single team. I start the simulation with over 80 parameters in the zcode formula to come up with a precise and easy to use prediction and not only tell you who is going to win, but also and most importantly, where the value is, which means more money can be made guessing. To learn more about how you can create a consistent \$1500 monthly from sports betting following our guide, just order this book right now!

Trading the Betfair and sporting markets in-play

is rapidly growing in popularity thanks to the increased sporting coverage available on many different satellite and cable channels. Many people start by just using Betfair to obtain better odds than those available at the traditional bookmakers. They then perhaps do a little more research and learn to trade the markets, but to make a regular profit a serious, disciplined and planned approach needs to be employed in order to not only win but keep on winning. 'Mastering Betfair' will take the reader through many of the low-risk strategies developed by the author over the past 3 years. The book also aims to highlight to the Betfair user the importance of employing disciplines - such as managing risk - that are normally associated with the financial markets, and indeed it is hoped that the book will also highlight to the financial trader the unique opportunities that are available on Betfair.

Sports Betting to Win - Steve Ward 2011-03-03

Thinking, and betting, like the pros "Most people in sports betting are looking at things the wrong way." - Peter Webb, founder of Bet Angel "Some people only ever seem to want to hit the sexy six, and not take the singles" - Compton Hellyer, founder of Sporting Index This is a book that teaches you how to bet on sports with the same discipline and mindset as the professionals. Lots of books and websites give advice on profitable strategies - and tipsters and systems proliferate. But this is the only guide that helps you make your trades and bank your wins for the long term, avoiding the perennial dangers of overconfidence, irrationality and emotion. However successful your selections, you are never safe from crippling losses until you know how to bet with the clear head and calm approach of the masters. With chapters ranging across motivation, performance analysis, the betting process and going pro, this book is the definitive guide to achieving this: - Use dozens of exercises to sharpen your thinking and refine your betting processes. - Share in the exclusive insights of professional sports bettors, who reveal for the first time how they have built successful gambling careers. - Benefit in every chapter

from one-to-one training from the author, a professional sports and trading performance coach. Sports Betting to Win is your own personal course for establishing a firm psychological foundation for long-term betting success.

Spread Betting - Brett Arends 2002

Fancy a local team to surprise everyone with a strong run in the League? Buy their championship points. Today more than 100,000 people in the UK are turning their football knowledge into profit through spread betting, the fastest growing phenomenon in gambling worldwide. Unlike traditional fixed odds betting, the spreads allow punters to bet against teams as well as for them, to place and close bets during the match and even to make money on a game before a ball has been kicked. Spread Betting - A Football Fan's Guide strips out the off-putting financial jargon and explains the system in clear English. Using vivid examples from top-class football, it takes you from the basics to the sophisticated techniques used by the professional gamblers. Drawing on exclusive interviews with the bookmakers and players, it also opens the door for the first time on what has become a multimillion pound industry.

Programming for Betfair - James Butler
2015-06-04

The Betfair exchange, coupled with its API, permits a suitably skilled trader to code complex trading applications, which would not look out of place in the financial markets. This book offers a sports trader the chance to build their own trading applications, regardless of their programming ability. Each chapter of *Programming for Betfair* contains snippets of code that combine to create a complete trading application. The application is geared towards horse racing but can easily be adapted to other sports on Betfair's exchange. Using Microsoft's Visual Studio (downloadable for free) the reader is shown how to code an application that will gather prices for any market on Betfair's exchange and then place bets into that market. The reader is shown how to automate their trading so that they can remove emotion from their trades and scale up their trading for increased profits. Further development of the application permits it to save data from Betfair onto the reader's hard drive for offline analysis and visualisation in a spreadsheet for the purpose of building trading algorithms. Also covered is an enhancement of Betfair's charts so that charts can be automatically updated and compared. The final chapter of the book discusses ideas for taking the application and the reader's skills to the next level. Topics discussed include constructing your own trading indicators, volume analysis, trend following, arbitrage, low-latency trading and many more.

Focus on: better odds, difference between Backing and Laying, Matched and Un-Matched bet, Keeping an offer until matched, levelling profits across all results, how Match Odds market works...We will keep this short and relevant, not to miss on any of the important details. No need to know the history of sports exchanges but only how they function - odds movement and value turning in your favour or not. When to go in and when to get out for a profit. Images at every step with real trades - also spreadsheets with how to keep track of your winnings and small recovery strategy on losing trades. See trading football Match Odds as any value trading: Stock, Forex, Cryptocurrencies, Gold... only that values change a lot faster - pre and during match duration.
