Carnot Cycle and Heat Engine Fundamentals and Applications - Michel Feidt 2020-07-03

This book results from a Special Issue related to the latest progress in the thermodynamics of machines systems and processes since the premonitory work of Carnot. Carnot invented his famous cycle and generalized the efficiency concept for thermo-mechanical engines. Since that time, research progressed from the equilibrium approach to the irreversible situation that represents the general case. This book illustrates the present state-of-the-art advances after one or two centuries of consideration regarding applications and fundamental aspects. The research is moving fast in the direction of economic and environmental aspects. This will probably continue during the coming years. This book mainly highlights the recent focus on the maximum power of engines, as well as the corresponding first law efficiency upper bounds.

AMC Muscle Cars : Muscle Car Color History - Larry G. Mitchell

Anybody who wanted to go toe to toe with the Big Three in the 1960s had to produce credible muscle cars. American Motors Corporation did exactly that with the SC Rambler and the incredibly fast AMX. Some argue, however, that AMC's insistence on pouring its relatively limited resources into the "muscle wars" ultimately led to its demise. Illustrated throughout with modern photography of restored and factory-original cars, archival images, AMC concept drawings, period advertisements, and cutaway illustrations, this color history primarily focuses on the conception, development, production, and performance of the AMX, as well as the Javelin upon which it was based. Special models like the Mark Donohue Signature Edition Javelin, along with the less-than-well-received Marlin, Rebel, SST, Hornet 360, Gremlin X, and others are also included.

Heavy-Duty-, On- und Off-Highway-Motoren 2016 - Wolfgang Siebenpfeiffer 2017-09-16

Die inhaltlichen Schwerpunkte des Tagungsbands zur ATZlive-Veranstaltung Heavy-Duty-, On- und Off-Highway-Motoren 2016 liegen unter anderem auf neuen Motoren und Komponenten für Nutzfahrzeuge, Off-Highway sowie Marine und Stationäranlagen, der Schadstoffreduzierung, der Einspritzung sowie Lösungen zur Motor- und Systemoptimierung. Die Berichte der Konferenz zeigen aktuelle und künftige Entwicklungen bei schweren Diesel- und Gasmotoren für verschiedene Anwendungen auf. Die Konferenz ist eine unverzichtbare Plattform für den internationalen Erfahrungsaustausch der Großmotoren-Experten. Die Steigerung der Effizienz bei gleichzeitiger Reduzierung der Schadstoffe und des Kraftstoffes sind weiterhin wichtige Zielsetzungen bei der Entwicklung neuer Motoren. Hierfür benötigt man einerseits neue, innovative Konzepte und Lösungen, andererseits muss aber auch das Zusammenspiel bestehender einzelner Systeme und Komponenten genau analysiert werden.
