Music in the Nineteenth Century - Walter Frisch 2013
Nineteenth-century music in its cultural, social, and intellectual contexts. *Music in the Nineteenth Century* examines the period from the Congress

of Vienna in 1815 to the advent of Modernism in the 1890s. Frisch traces a complex web of relationships involving composers, performers, publishers, notated scores, oral traditions, audiences, institutions, cities, and nations. The book's central themes include middle-class involvement in music, the rich but elusive concept of Romanticism, the cult of virtuosity, and the ever-changing balance between musical and commercial interests. The final chapter considers the sound world of nineteenth-century music as captured by contemporary witnesses and early recordings. *Western Music in Context: A Norton History* comprises six volumes of moderate length, each written in an engaging style by a recognized expert. Authoritative and current, the series examines music in the broadest sense--as sounds notated, performed, and heard--focusing not only on composers and works, but also on broader social and intellectual currents.

Free Radicals in Biology and Medicine - Barry Halliwell 2015

Free Radicals in Biology and Medicine has become a classic text in the field of free radical and antioxidant research. Now in its fifth edition, the book has been comprehensively rewritten and updated whilst maintaining the clarity of its predecessors. Two new chapters discuss 'in vivo' and 'dietary' antioxidants, the first

emphasising the role of peroxiredoxins and integrated defence mechanisms which allow useful roles for ROS, and the second containing new information on the role of fruits, vegetables, and vitamins in health and disease. This new edition also contains expanded coverage of the mechanisms of oxidative damage to lipids, DNA, and proteins (and the repair of such damage), and the roles played by reactive species in signal transduction, cell survival, death, human reproduction, defence mechanisms of animals and plants against pathogens, and other important biological events. The methodologies available to measure reactive species and oxidative damage (and their potential pitfalls) have been fully updated, as have the topics of phagocyte ROS production, NADPH oxidase enzymes, and toxicology. There is a detailed and critical evaluation of the role of free radicals and other reactive species in human diseases, especially cancer, cardiovascular, chronic

inflammatory and neurodegenerative diseases. New aspects of ageing are discussed in the context of the free radical theory of ageing. This book is recommended as a comprehensive introduction to the field for students, educators, clinicians, and researchers. It will also be an invaluable companion to all those interested in the role of free radicals in the life and biomedical sciences.

Music and Protest in 1968 -
Beate Kutschke 2013-04-25
Music was integral to the profound cultural, social and political changes that swept the globe in 1968. This

collection of essays offers new perspectives on the role that music played in the events of that year, which included protests against the ongoing Vietnam War, the May riots in France and the assassination of Martin Luther King, Jr. From underground folk music in Japan to antiauthoritarian music in Scandinavia and Germany, *Music and Protest in 1968* explores music's key role as a means of socio-political dissent not just in the US and the UK but in Asia, North and South America, Europe and Africa. Contributors extend the understanding of musical protest far beyond a narrow view of the 'protest song' to explore how politics and social protest played out in many genres, including experimental and avant-garde music, free jazz, rock, popular song, and film and theatre music.

Strengthening Forensic Science in the United States - National Research Council
2009-07-29

Scores of talented and dedicated people serve the forensic science community,

performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United*

States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

All Made of Tunes - James
Peter Burkholder 1995-01-01
Charles Ives is famous for
using borrowed material in his
music. Almost two hundred
individual works or
movements, spanning his
entire career and representing
more than a third of his output,
incorporate music by other
composers or from his own
previous work. In this book, the
eminent Ives scholar J. Peter
Burkholder identifies the
different kinds of "quotations"
in Ives's music, explores the
complex musical, aesthetic,
and psychological motivations
behind the borrowings, and
shows the purpose, techniques,
and effects that characterize
each one. Burkholder
catalogues fourteen distinct
ways that Ives borrowed,
ranging from direct quotation
to paraphrase, variation,
collage, modeling, and stylistic
allusion. Arguing that these
borrowing procedures were
compositional strategies, he

provides a new perspective on
Ives's process of composition.
In addition, by tracing the
development of Ives's
borrowing practices through
his career, he contributes to an
understanding of the
composer's stylistic evolution.
And by showing how much of
Ives's music uses borrowing
procedures that are common to
many composers, he reveals
that Ives is not as far removed
from the classic-romantic
tradition as has been thought.
Finally, Burkholder's
comprehensive treatment of
Ives's borrowing techniques
offers a new perspective on the
entire field of musical
borrowing.

Music in the Eighteenth

Century - John A. Rice 2013
Eighteenth Century Music in its cultural, social, and intellectual contexts. John Rice's *Music in the Eighteenth Century* takes the reader on an engrossing Grand Tour of Europe's musical centers, from Naples, to London, Berlin, Vienna, Prague, and St. Petersburg —with a side trip to the colonial New World. Against the backdrop of Europe's largely peaceful division into Catholic and Protestant realms, Rice shows how "learned" and "galant" styles developed and commingled. While considering Mozart, Haydn, and early Beethoven in depth, he broadens his focus to assess the contributions of lesser-known but significant figures like Johann Adam Hiller, Francois-André Philidor, and Anna Bon. *Western Music in Context: A Norton History* comprises six volumes of moderate length, each written in an engaging style by a recognized expert. Authoritative and current, the series examines music in the

broadest sense—as sounds notated, performed, and heard—focusing not only on composers and works, but also on broader social and intellectual currents.

Music in the Twentieth and Twenty-First Centuries

(Western Music in Context: A Norton History) - Joseph

Auner 2013-05-07

The music of the twentieth and twenty-first centuries in its

cultural, social, and intellectual contexts. Joseph Auner's *Music in the Twentieth and Twenty-First Centuries* explores the sense of possibility unleashed by the era's destabilizing military conflicts, social upheavals, and technological advances. Auner shows how the multiplicity of musical styles has called into question traditional assumptions about compositional practice, the boundaries of music and noise, and the relationship among composer, performer, and listener. He also shows how composers and their works have played important roles in defining ideas of nation, race, and gender, and thus in shaping the modern world for better and worse. *Western Music in Context: A Norton History* comprises six volumes of moderate length, each written in an engaging style by a recognized expert. Authoritative and current, the series examines music in the broadest sense—as sounds notated, performed, and heard—focusing not only on composers and works, but also

on broader social and intellectual currents.

Born in Blackness: Africa, Africans, and the Making of the Modern World, 1471 to the Second World War -

Howard W. French 2021-10-12

Revealing the central yet

intentionally obliterated role of Africa in the creation of modernity, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the “New World.” Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, *ad infinitum*. The history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the

economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe’s dehumanizing engagement with the “dark” continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe’s yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who

heroically battled seventeenth-century European powers, to the ex-slaves who liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more often, elision in depictions of African history throughout the last five hundred years. As French shows, the achievements of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siloed and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic “rise of the West” theories that have endured to this day. “Capacious and compelling” (Laurent Dubois), *Born in Blackness* is epic history on the

grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest “commodity” of them all, the twelve million people who were brought in chains from Africa to the “New World,” whose reclaimed lives shed a harsh light on our present world.

Music in the Renaissance -

Richard Freedman 2013

“Like the other volumes in the series, *Music in the Renaissance* brings a fresh perspective to the study of music by emphasizing social, cultural, intellectual, and political contexts of the music. Richard Freedman looks far beyond the notes on the page or the details of composers’ lives to embrace audiences, performers, institutions, and social settings. For example, the text shows how new technologies of music printing in the Renaissance permitted composers to align notation with sound, causing audiences accustomed to aural transmission to rethink the

concept of a musical work."--

The Song Machine: Inside the Hit Factory - John

Music in the Medieval West (Western Music in Context: A Norton History) - Margot Fassler 2014-03-27

Medieval music in its cultural, social, and intellectual contexts. Margot Fassler's *Music in the Medieval West* imaginatively reconstructs the repertoire of the Middle Ages by drawing on a wide range of sources. In addition to highlighting the ceremonial and dramatic functions of medieval music (both sacred and secular), she pays special attention to the exchange of musical ideas, the development

of musical notation and other methods of transmission, and the role of women in musical culture. *Western Music in Context: A Norton History* comprises six volumes of moderate length, each written in an engaging style by a recognized expert.

Authoritative and current, the series examines music in the broadest sense—as sounds notated, performed, and heard—focusing not only on composers and works, but also on broader social and intellectual currents.

World Report on Ageing and Health - World Health

Organization 2015-10-22

The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment

in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored

range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.
