**Middle English Devotional Compilations** - Diana Denissen 2019-10-15  
Middle English devotional compilations - consisting of a series of texts or extracts of texts that have intentionally been put together to constitute new and unified devotional texts - have often been approached as complex collections of source texts that need to be linked with their originals. This book argues that the study of compilations should move beyond the disentanglement of their sources. It approaches compiling as a literary activity and an active way of shaping the medieval text, with the aim to nuance scholarly discussion about compiling by putting greater emphasis on the literary instead of the technical aspects of compiling activity. In addition to describing the additions, omissions and other types of adaptations that compilers made to their source texts, Middle English Devotional Compilations highlights the nature

and function of compiling activity in late medieval England, and examines three major but understudied Middle English devotional compilations in depth: The Pore Caitif, The Tretyse of Love and A Talkyng of the Love of God.
