Absolument dé-bor-dée ! - Zoé Shepard 2010-03-03

Dur, dur d'être fonctionnaire !Embauchée après huit ans d'études supérieures dans une mairie de province, Zoé Shepard a vite déchanté. Plongée dans un univers où incompétence rime avec flagornerie, ses journées sont rythmées par des réunions où aucune décision n'est jamais prise, de rapports qu'elle doit rédiger en dix jours (quand deux heures suffisent), de pots de bienvenue, de départ, d'anniversaire.Sans oublier les séminaires « de formation », les heures à potiner à la cantine et à la machine à café, les chefs « débordés » par les jeux en ligne et les préoccupantes interrogations de tous sur les destinations de vacances et autres RTT...Chargée de mission dans un service fourre-tout, truqueuse patentée de notes administratives, G.O. pour délégations étrangères et hocheuse de tête en réunions, Zoé Shepard raconte avec un humour

mordant ses tribulations de fonctionnaire désespérée dans un univers bien pire que tout ce que vous pouviez imaginer.

The authors have cleverly used exercises and their solutions to explore the concepts of multivariate data analysis. Broken down into three sections, this book has been structured to allow students in economics and finance to work their way through a well formulated exploration of this core topic. The first part of this book is devoted to graphical techniques. The second deals with multivariate random variables and presents the derivation of estimators and tests for various practical situations. The final section contains a wide variety of exercises in applied multivariate data analysis.

Janus Politique - André ANGOTTI 2016-10-14T00:00:00Z

Ce livre fait des révélations sur des sujets comme la crise des subprimes : une ingérence des politiques américains à l'origine de la bulle financière ; Standard et Poors : condamnée pour avoir trompé les investisseurs ; La Table Ronde à Bruxelles : l'avantage d'avoir créé l'Union Européenne : les traités passent au-dessus des lois des pays ; L'église orthodoxe en Grèce : pour construire bon marché, construisez une petite chapelle orthodoxe ; le calcul du PIB : raisonner juste avec des chiffres faux ; Manuel Valls : « S'attaquer aux 35 heures, c'est se donner les marges de manœuvre pour sortir du blocage français » Ce livre se veut aussi source de propositions pour la transformation du monde politique. Pour que la politique change, il faut changer le système. Même si les hommes et femmes politiques affirment, qu'avec l'âge et l'expérience, ils ont changé, nous devons admettre qu'en réalité personne ne change réellement.

Directions of Development of Transport Networks and Traffic

Engineering - Elżbieta Macioszek 2018-07-30

This book offers a collection of valuable guidelines for making decisions concerning the future development of transport networks and traffic engineering. The decision-making support systems described here will certainly attract the interest of those who face the challenge of finding solutions to problems concerning modern transport systems on a daily basis. Consequently, the book is chiefly intended for local authorities involved in planning and preparing development strategies for specific transport-related areas (in both urban and regional contexts), as well as for representatives of business and industry who are directly engaged in the implementation of traffic engineering solutions. The guidelines provided in the respective chapters help to address the given problem soundly, and to simplify the selection of an appropriate strategy. The topics covered include increasing the competitiveness of public transport, the status quo of electric vehicle infrastructures worldwide, methods for calming urban traffic as an element of sustainable transport development, speed traffic zones and electric buses, car-sharing systems in Poland, a method for deconstructing the regional travel demand model, monitoring urban traffic using floating car data, problems of deliveries in urban agglomeration distribution systems, estimating the number of threatened people in case of fire in road tunnels, and road pavement evaluation using advanced tools. Since the book also considers new approaches to theoretical models (including traffic flow surveys and measurements, transport behaviors, human factors in traffic engineering, and road condition modeling), it will also appeal to researchers and scientists studying these problems. The book gathers selected papers presented at the 15th Scientific and Technical Conference "Transport Systems. Theory and Practice", organized by the Department of Transport Systems and Traffic Engineering, Silesian University of Technology in Katowice, Poland on September 17-19, 2018.
