Political Economy of Malaysia's Industrial Policy - Firdausi Suffian 2021-02-22

This book examines the national automotive policy in Malaysia to help readers gain an understanding of the country's industrial policy-

making processes. Addressing a gap in analysis of the political economy of the national automotive policy, the research presented combines the new institutional theory and the developmental state approach to provide new insights into elite policymakers' measures to shield domestic automotive enterprises from pro-market reforms. The formation of the national car project marks a turning point for Malaysia's industrial development as a country, which it envisions will lead to it becoming a major player in the global automotive market. However, the domestic institutional factors embedded in ethno-economic interests and patronage constrain national car-makers, limiting their potential to grow, and instead causing a slowdown in the industry. Allowing readers to understand the background to Malaysia's heavy industrialisation programme and the birth of its national car projects, this book critically discusses the significance of institutional context in policy outcomes, and highlights how institutions and policies have impact growth or decline. It is a valuable resource relevant to analysts, researchers and students who are interested in the political economy of the national industrial policy and automotive industry in Malaysia and beyond.

The Second Automobile Revolution - M. Freyssenet 2009-04-30

The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the

nineties.

The World's Cities - Andrew James Jacobs 2012

The World's Cities offers instructors and students in higher education an accessible introduction to the three major perspectives influencing city-regions worldwide: City-Regions in a World System; Nested City-Regions; and The City-Region as the Engine of Economic Activity/Growth. The book provides students with helpful essays on each perspective, case studies to illustrate each major viewpoint, and discussion questions following each reading. The World's Cities concludes with an original essay by the editor that helps students understand how an analysis incorporating a combination of theoretical perspectives and factors can provide a richer appreciation of the world's city dynamics.

Competitive Ties - Michael Smitka 1991

From the preeminent writer of Taiwanese nativist fiction and the leading translator of Chinese literature come these poignant accounts of everyday life in rural and small-town Taiwan. Huang is frequently cited as one of the most original and gifted storytellers in the Chinese language, and these selections reveal his genius. In "The Two Sign Painters," TV reporters ambush two young workers from the country taking a break atop a twenty-four-story building. "His Son's Big Doll" introduces the tortured soul inside a walking advertisement, and in "Xiaoqi's Cap" a dissatisfied pressure-cooker salesman is fascinated by a young schoolgirl. Huang's characters -- generally the uneducated and disadvantaged who must cope with assaults on their traditionalism, hostility from their urban

brethren and, of course, the debilitating effects of poverty -- come to life in all their human uniqueness, free from idealization.

How Asia Got Rich: Japan, China and the Asian Miracle - Edith Terry 2015-05-20

Within a few short months in 1997, Asian economies that had been considered not only healthy but "miraculous" suddenly fell off a precipice as investors withdrew massively first from Asian currencies and, in rapid order, from equity markets across the region. On October 27 1997, the turmoil in Asian markets spooked Wall Street in the largest single-day decline in history, a drop of 550 points. It was predicted that the Asian crash could drive the US trade deficit from \$191 billion to \$300 billion by 1998,

creating huge new tensions in relations with some of the largest US trading partners. These wrenching changes, following a generation of success, raise numerous questions about the steps that led to the crisis, its likely outcome and the limits and constraints of "Asian capitalism". Edith Terry presents a blow-by-blow account of the crisis, beginning with the 1996 collapse of the Bangkok Bank of Commerce. In her overview, she links the fall of the Asian miracle with the theme of globalization, arguing that the crisis demonstrates the urgency of dismantling restraints to trade, investment, and financial services, and that the United States should take leadership in pushing for new and sweeping reform through the World Trade Organization and in bilateral negotiations with its trading partners. The final section of the book deals with the rise of the "Asian miracle" - how the myth was created, who created it, why it succeeded for so long - and is informed by analysis of the Japanese prototype.

Geely Drives Out: The Rise Of The New Chinese Automaker In The Global Landscape - Hua Wang 2021-07-13

Since 2008, while the global automotive manufacturing has been faltering, the Chinese

auto industry has been swiftly transformed into the largest producer in the world. The growth of the Chinese automakers is a close reflection of China's powerful manufacturing economy, and Geely Auto is one such best example. This book closely examines the rise of Geely as a privately-owned automaker in China. From its humble beginning as a refrigerator component maker and motorcycle manufacturer in the late twentieth century, Geely has grown to become not only a top selling national brand in China, the largest auto market in the world, but also a significant player in the global automotive industry. The book studies Geely's successful acquisition of Volvo, within a long-term framework of asset-seeking foreign direct investment, and then further investigates its recent strategic initiatives with Daimler, London Taxi, PROTON and Lotus. The book reveals how the little-known carmaker is worth close examination, via its product development, organizational dynamics, corporate culture, brand development, talent and cross-cultural management strategies, as well as the entrepreneurship of its visionary founder Shufu Li. From catching up in technology to a leader in product, service and business model innovations, Geely has driven out as a new Chinese automaker on the world stage. Facing challenges in clean energy and Internet of Things, artificial intelligence, new user's experience towards smart and mobility solution, Geely will continue to play an increasingly important role in the globalization age of the twenty-first century.

Industrial Technology Development in Malaysia - Greg Felker 2013-02-01

This book, and its companion, *Technology, Competitiveness and the State*, examine and evaluate Malaysian industrialization in terms of its experience of and prospects for industrial technology development. The focus is on the development of Malaysia's technological-industrial base from a sector and firm-specific perspective, including the role of foreign multinationals in this process. *Industrial Technology Development in Malaysia*, provides a valuable analysis of the technological development of a Newly Industrializing Country and reflects on whether existing development strategies can be maintained in the wake of the financial crises sweeping the East Asian economies.

Automotive Industrialisation - Kaoru Natsuda 2020-10-15

This book looks at the industrial policies of Southeast Asian economies in their motor vehicle industries from early import substitution to policy-making under the more liberalised WTO policy regime. The book examines how inward automotive investment, especially from Japan, has been affected by policies, and how such investment has promoted industrial development in the late-industrialising economies within ASEAN (Association of Southeast Asian Nations). It provides insights into the automotive industry of Southeast Asia in terms of production volumes, sales volumes, market structure, and trade. Through country case studies, the book is a useful reference and illustrates how industrial policies in Southeast Asia have affected the spread of automotive development in the region. It will appeal to policy-makers and researchers interested in the automobile industry, industrial policies in the industry and the spread of development from foreign investors to local firms.

Social Reconstructions of the World Automobile

Industry - Frederic C. Deyo 2016-07-27

This book assesses the varying ways in which automobile assemblers in several countries of East and Southeast Asia, Europe and the Americas have sought to enhance their efficiency and flexibility in response to heightened global competition during the 1980s and early 1990s. It then explores the implications of such managerial strategies for workers and trade unions, and the responses of unions in seeking to preserve or enhance worker welfare and voice under industrial restructuring. *Who Really Made Your Car?* - Thomas H. Klier 2008

This book offers a comprehensive look at an industry that plays a growing role in motor vehicle production in the United States. Cars, Carriers of Regionalism? - J. Carrillo 2004-06-30

This highly topical book brings together some of the world's leading specialists on the global car industry who discuss the ins and outs of the faster lane of regionalism at a time that the world is reassessing the ins and outs of globalization. It provides a thorough and updated mapping of the worldwide geography of the car industry, in the triad regions (Europe, North America and Japan), and in the emerging countries and regions.

Mitsubishi A6M Zero - James D'Angina 2016-10-20

Unquestionably the most iconic Japanese fighter of World War II, the Mitsubishi A6M Rei-Sen, Type Zero fighter was used from the initial raid on Pearl Harbor up to the Kamikaze attacks at the end of the war. Facing off against the likes of the Wildcat, Corsair and even the Spitfire, the Zero gained a legendary reputation amongst Allied pilots due to its incredible manoeuvrability. Detailed analysis of its technical qualities show why the Zero was so feared, but also pinpoints the weaknesses that would eventually be its downfall as Allied pilots learned how to combat it. A selection of historical photographs and unique artwork accompany the analysis as James D'Angina delves into the history of the premier Axis fighter of the Pacific Theatre, exploring the design and combat effectiveness of the Zero as well as the tactics developed by Allied pilots to counter it.

The Third Globalization - Dan Breznitz
2013-03-26

Given the powerfully negative and ongoing impact of the Great Recession on western economies, the question of whether historically wealthy nations-the US, Western European countries, Japan-can stay wealthy has become an overriding concern for virtually every interested observer. Can their middle classes remain comfortable as more and more good and technically jobs disappear to other parts of the world? Can they support themselves as they devote more and more economic resources to an aging population base? In *The Third Globalization*, eminent political economists Dan Breznitz and John Zysman gather some of the discipline's leading scholars to assess the prospects for growth and prosperity among advanced industrial nations.

Plunkett's Automobile Industry Almanac 2008 - Jack W. Plunkett 2007-10

The automobile industry is evolving rapidly on a worldwide basis. Manufacturers are merging, component design and manufacture are now frequently outsourced instead of being created in-house, brands are changing and the giant auto makers are expanding deeper into providing financial services to car buyers. The skyrocketing price of gas spurs developments in hybrid technology and clean diesel, as manufacturers look for ways to improve fuel efficiency. Meanwhile, all of the biggest, most successful firms have become totally global in nature. *Plunkett's Automobile Industry Almanac* will be your complete guide to this immense, fascinating industry. On the car dealership side, giant, nationwide holding companies have acquired the best dealers in major markets. Even the used car business is being taken over by national chains. E-commerce is having profound effects on the car industry. Consumers

use the Internet to become better informed before making a purchase. Online sites like Autobytel steer millions of car buyers toward specific dealers while the same sites deliver competing bids for cars, insurance and financing in a manner that lowers costs and improves satisfaction among consumers. Meanwhile, auto makers are using the latest in e-commerce methods to manage their supply chains and replenish their inventories. This exciting new book (which includes a database on CD-ROM) is a complete reference tool for everything you need to know about the car, truck and specialty vehicles business, including: Automotive industry trends and market research; Mergers, acquisitions, globalization; Automobile manufacturers; Truck makers; Makers of specialty vehicles such as RVs; Automobile loans, insurance and other financial services; Dealerships; Components manufacturers; Retail auto parts stores; E-commerce ; and much, much more. Replacing Your Boat's Engine - Mike Westin

2012-11-02

The first in a series of highly practical, hands on, step-by-step photographic manuals, *Replacing Your Boat's Engine* fills a gap in the market for the DIY boat builder and repairer. It is a subject covered only in piecemeal fashion by the yachting press, which, like general boat repair manuals, can't go into the level of detail Mike Westin does. This is a visual, hand-holding guide, dwelling on the practical details of replacing a boat's engine and related systems as it explains each procedure rather than focussing on the theory (which is relegated to an appendix, for those who wish to go further). Anyone who wishes to upgrade their boat's engine or replace an ailing or broken engine will find this step-by-step illustrated book a hand-holding godsend.
