Контроль промышленных
выбросов автоматическими
измерительными системами -

Конопелько Леонид
Алексеевич
В России к особо острой
проблеме в области охраны
окружающей среды
относится проблема качества

атмосферного воздуха, которое определяется в первую очередь выбросами промышленных предприятий. Представляемая монография является первым в России изданием по современному состоянию контроля промышленных выбросов с использованием автоматических измерительных систем (АИС). В ней представлены сведения о нормативном регулировании применения АИС для контроля выбросов, как в странах, имеющих более, чем сорокалетний практический опыт в этой области, так и в России. Проведен анализ отечественной и зарубежной нормативно-правовой и нормативно-технической документации, регулирующей сферу применения АИС для контроля выбросов. Представлен обзор современных методов и аналитического оборудования, используемых в АИС. Основное место в монографии занимает

изложение научно обоснованных принципов и методов метрологического обеспечения измерений с помощью АИС, реализация которых определяют достоверность и точность информации о содержании загрязняющих веществах в промышленных выбросах. Своевременность и важность опубликования монографии определяется тем, что в России проходит начальный этап использования АИС для контроля промышленных выбросов, поэтому представленный материал, систематизирующий и обобщающий имеющийся опыт в этой области и охватывающий большой объем информации, имеет большое практическое значение. Издание предназначено для работников метрологических и экологических служб предприятий, центров стандартизации и метрологии, сотрудников организаций, аккредитованных в области проведения испытаний и

поверки газоаналитического оборудования, научных сотрудников экологических и природоохранных лабораторий и химиков-аналитиков других экологических учреждений, а также для студентов и аспирантов вузов по специальностям «Экология и природопользование», «Промышленная экология».

Accounting for Carbon -

Valentin Bellassen 2015-03-19

The ability to accurately monitor, record, report and verify greenhouse gas emissions is the cornerstone of any effective policy to mitigate climate change. Accounting for Carbon provides the first authoritative overview of the monitoring, reporting and verification (MRV) of emissions from the industrial site, project and company level to the regional and national level. It describes the MRV procedures in place in more than fifteen of the most important policy frameworks - such as emissions trading systems in Europe, Australia, California and China, and the United Nations Framework Convention on Climate Change - and compares them along key criteria such as scope, cost, uncertainty and flexibility. This book draws on the work of engineers and economists to provide a practical guide to help government and non-

governmental policymakers and key stakeholders in industry to better understand different MRV requirements, the key trade-offs faced by regulators and the choices made by up-and-running carbon pricing initiatives.

Phosphorus: Polluter and Resource of the Future -

Christian Schaum 2018-03-15

This comprehensive book provides an up-to-date and international approach that addresses the Motivations, Technologies and Assessment of the Elimination and Recovery of Phosphorus from Wastewater. This book is part of the Integrated Environmental Technology Series.

ATF - National Firearms Act Handbook - U.S. Department of Justice 2019-03-17

This handbook is primarily for the use of persons in the business of importing, manufacturing, and dealing in firearms defined by the

National Firearms Act (NFA) or persons intending to go into an NFA firearms business. It should also be helpful to collectors of NFA firearms and other persons having questions about the application of the NFA. This publication is not a law book. Rather, it is intended as a 'user friendly' reference book enabling the user to quickly find answers to questions concerning the NFA. Nevertheless, it should also be useful to attorneys seeking basic information about the NFA and how the law has been interpreted by ATF. The book's Table of Contents will be helpful to the user in locating needed information. Although the principal focus of the handbook is the NFA, the book necessarily covers provisions of the Gun Control Act of 1968 and the Arms Export Control Act impacting NFA firearms businesses and collectors. Elusive Utopia - Gary Kornblith
2018-12-05

Before the Civil War, Oberlin, Ohio, stood in the vanguard of the abolition and black freedom movements. The community, including co-founded Oberlin College, strove to end slavery and establish full equality for all. Yet, in the half-century after the Union victory, Oberlin's resolute stand for racial justice eroded as race-based discrimination pressed down on its African American citizens. In *Elusive Utopia*, noted historians Gary J. Kornblith and Carol Lasser tell the story of how, in the nineteenth and early twentieth centuries, Oberlin residents, black and white, understood and acted upon their changing perceptions of race, ultimately

resulting in the imposition of a color line. Founded as a utopian experiment in 1833, Oberlin embraced radical racial egalitarianism in its formative years. By the eve of the Civil War, when 20 percent of its local population was black, the community modeled progressive racial relations that, while imperfect, shone as strikingly more advanced than in either the American South or North. Emancipation and the passage of the Civil War amendments seemed to confirm Oberlin's egalitarian values. Yet, contrary to the expectations of its idealistic founders, Oberlin's residents of color fell increasingly behind their white peers economically in the years after the war. Moreover, leaders of the white-dominated temperance movement conflated class, color, and respectability, resulting in stigmatization of black residents. Over time, many white Oberlinians came to view black poverty as the result of personal failings, practiced residential segregation, endorsed racially

differentiated education in public schools, and excluded people of color from local government. By 1920, Oberlin's racial utopian vision had dissipated, leaving the community to join the racist mainstream of American society. Drawing from newspapers, pamphlets, organizational records, memoirs, census materials and tax lists, *Elusive Utopia* traces the rise and fall of Oberlin's idealistic vision and commitment to racial equality in a pivotal era in American history.

Homeland Security Law and Policy - William C. Nicholson 2005

"This book is dedicated with appreciation to the warriors who defend us on foreign soil and the emergency responders and emergency managers who daily confront homeland security's challenges"--P. [v]. *Government Reports Annual Index* - 1975

A Magnificent Journey to Excellence - George K. Strotbeck III 2019-12-16
This book presents a model of organization transformation success. The model framework comprises a series of S-Curves (maturity curves) of planning and execution activities phased over time. The model is illustrated through description and analysis of an actual, two-decade, highly successful, global enterprise transformation Six Sigma program at a Fortune 200 company: Cummins, Inc. Lessons learned from the model and company case study are completely transferrable to other organizational culture, improvement and innovation transformation settings. This insightful book: • Documents a firsthand account of a successful transformation. The authors completely explain what was accomplished and the lessons learned from a 16-year deployment of Six Sigma at Cummins. • Acts as a benchmark for those organizations interested in pursuing primarily a

continuous improvement transformation, and more generally for other types of transformation efforts. • Includes substantive interviews with ten key leaders and others who made the transformation possible. • Helps organizations shorten the overall transformation timelines. The documentation of a transformation provides you a model for how to think about organization transformation maturity over time and plan for it. • Recognizes the work of thousands of people involved in transforming a global company. The interviews provide extraordinary perspectives not only by executives who initiated and sustained the transformation program but also by program participants who themselves grew as managers and leaders in their careers through the program. Essentially, this book helps early-career managers and executives see the broader picture of enterprise transformation, especially over time. This helps them be better managers and executives, and

importantly, helps them better plan for and hasten their upward career trajectories. Lastly, the book describes a view of possibilities. It describes a clear, sustained success, the steps taken to get there and the measurement of progress. The result provides you with confidence that successful transformation is possible and worth the effort. *CIS Federal Register Index* - 1994

**Achieving the Paris Climate
Agreement Goals** - Sven
Teske 2019-02-01

This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate

mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy

negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.

Sociological Abstracts - Leo P. Chall 2004

CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences. The database provides abstracts of journal articles and citations to book reviews drawn from over 1,800+ serials publications, and also provides abstracts of books, book chapters, dissertations, and conference papers.

The NSA Report - President's Review Group on Intelligence and Communications Technologies, The 2014-03-31
The official report that has shaped the international debate about NSA surveillance

"We cannot discount the risk, in light of the lessons of our own history, that at some point in the future, high-level government officials will decide that this massive database of extraordinarily sensitive private information is there for the plucking.

Americans must never make the mistake of wholly 'trusting' our public officials."—The NSA Report This is the official report that is helping shape the international debate about the unprecedented surveillance activities of the National Security Agency.

Commissioned by President Obama following disclosures by former NSA contractor Edward J. Snowden, and written by a preeminent group of intelligence and legal experts, the report examines the extent of NSA programs and calls for dozens of urgent and practical reforms. The result is a blueprint showing how the government can reaffirm its commitment to privacy and civil liberties—without compromising national security.
