Estrategias tecnológicas para la industria de la hostelería - Peter D. Nyheim 2019-10-22

Los procesos comerciales en la industria de la hostelería, como toda industria en la actualidad, están atravesados por las nuevas tecnologías que aportan rapidez, eficiencia y posibilidad de control al ámbito de la gestión. La industria del turismo, y en especial todo lo relacionado con el hospedaje y la alimentación del viajero, se mueve con una fuerte dinámica, y la rapidez de la respuesta es uno de los aspectos prioritarios junto con la necesidad de lograr la total satisfacción de las demandas tanto de clientes como de proveedores. En todos estos procesos, las tecnologías de la información (TI), los sistemas de información (IS) y los sistemas de gestión de la información (MIS) son la herramienta clave en el éxito de los procesos vinculados tanto en las operaciones diarias como en la planificación. Este libro, dirigido tanto a estudiantes como a profesionales vinculados a la hostelería, es el resultado de una colaboración entre autores que han vivido las situaciones que se plantean en él. Cada capítulo cuenta con entrevistas a líderes de la industria en las que se reconocen casos concretos de aplicación de tecnología en la hostelería. Sin dudas, las nuevas tecnologías ofrecen un mayor número de oportunidades tanto a gerentes como a clientes; desde hacer una reserva a través de una aplicación, hasta la experimentación de un servicio mediante recursos tecnológicos de realidad aumentada. De ahí la importancia, necesidad y pertinencia de este libro, que alcanza con esta su tercera edición, primera en español.

Technology Application in Tourism in Asia - Azizul Hassan 2022-03-02

This book very specifically focuses on technology application in tourism in Asia. The book contains twenty-seven chapters in four sections (i.e., theories, innovations, practices, and future research directions), based on the intriguing qualities and importance of technology applications in the Asian tourism business. This book, a blend of comprehensive and extensive efforts by the contributors and editor, is designed to extensively cover technology applications in tourism in Asia, including distinct topics such as mobile computing, new product designs, innovative technology usages in tourism promotion, technology-driven sustainable tourism development, location-based apps, mobility, accessibility, the post crisis situation of COVID-19, etc. This book is a significant contribution towards the very limited knowledge of technology applications in tourism, with selected examples of Asian countries. The importance of technology in Asian tourism is rapidly increasing, and has led to a rise in luxury, allowing citizens to enjoy leisure travel over both long and short distances. The rise of low-cost airlines and the region's growing, affluent middle class have changed the tourism environment dramatically. More tourists are booking their holidays online as a result of technological advancements. Online travel is the most important and well-established aspect of Asia's Internet economy. Considering the ongoing trend of technology applications in the tourism industry in Asia, more research attempts like this book need to be made aiming towards exploring diverse aspects. As tourism is an expanding area, this book can serve as a reading companion for tourism students, policy planners and industry professionals. This book is expected to be appreciated by expatriate researchers and researchers having a keen interest in the Asian tourism industry.

Are You an Ostrich Or a Llama? - Larry Mogelonsky 2012-07

Are You an Ostrich or a Llama? Written by one of the world's most published authors in the field of hospitality, this book represents a radical departure from traditional texts in the industry. Targeted at hotel management, this book is intended to serve as a platform for discussion on current issues relating to the

performance of hotels and resorts. Through a combination of real life examples and an examination of current challenges facing the hotel industry, the book comprises approximately one hundred individual segments each dedicated to a single thought or concept. These stand alone articles are then combined into ten chapters, each dedicated to a specific topic. The book has been written so that hoteliers of any level, from apprentice to seasoned general manager will be able to gain value from the contents. While the bulk of articles deal with marketing aspects, many of the items relate to core operational issues. A theme common throughout is to recognize the importance of guest service as it relates to the industry. For those who are not involved in the hotel industry, but have careers that involve customer service, the practical hints provided throughout the text, serve as excellent training pointers. So, why the title? Ostriches are classically known as avoiding conflict by putting their head in the sand. While probably not true, the stigma remains, and those who are considered an ostrich, are living in the past. Llamas, on the other hand, are considered utilitarian, hardworking and reliable. This is what you want to strive for. By reading this book, and digesting the contents, the hope is to move from ostrich to llama.
