African Regional Community Courts and their Contribution to Continental Integration - Jörg Kleis 2016-05-19

African Regional Communities have been portrayed by international legal scholars on a regular basis. Yet, this is only partially the case with regard to their respective judicial organs. For the first time a contribution

exclusively focuses on the West African ECOWAS, the Southern African SADC and the East African EAC courts and their jurisprudence. After outlining the potential of community courts to contribute to integration follows a microscopic analysis of pertinent extracts from their judgments regarding the courts' methodology, their jurisdiction and procedural law, the hierarchy between community and national legislation, the question of regional human rights protection and the essential obstacle to integration, which is non-compliance. The research is completed by evaluating whether the three courts had a share in the integration process and to what extent they are able to further promote integration in the future.

Towards a Sustainable European Company Law - Beate Sjøfjell 2009-01-01

No one doubts any longer that sustainable development is a normative imperative. Yet there is unmistakably a great reluctance to acknowledge any legal basis upon which companies are obliged to forgo 'shareholder value' when such a policy clearly dilutes responsibility for company action in the face of continuing environmental degradation. Here is a book that boldly says: 'Shareholder primacy' is wrong. Such a narrow, short-term focus, the author shows, works against the achievement of the overarching societal goals of European law itself. The core role of EU

company and securities law is to promote economic development, notably through the facilitation of market integration, while its contributory role is to further sustainable development through facilitation of the integration of economic and social development and environmental protection. There is a clear legal basis in European law to overturn the poorly substantiated theory of a 'market for corporate control' as a theoretical and ideological basis when enacting company law. With rigorous and persuasive research and analysis, this book demonstrates that: European companies should have legal obligations beyond the maximization of profit for shareholders; human and environmental interests may and should be engaged with in the realm of company law; and company law has a crucial role in furthering sustainable development. As a test case, the author offers an in-depth analysis of the Takeover Directive, showing that it neither promotes economic development nor furthers the integration of the economic, social and environmental interests that the principle of sustainable development requires. This book goes to the very core of the ongoing debate on the function and future of European company law. Surprisingly, it does not make an argument in favour of changing EU law, but shows that we can take a great leap forward from where we are. For this powerful insight - and the innumerable recognitions that support it - this book is a timely and exciting new resource for lawyers and academics in 'both camps' those on the activist side of the issue, and those with company or official policymaking responsibilities.

Private International Law and the Internet - Dan Jerker B. Svantesson 2016-03-22

In this, the third edition of *Private International Law and the Internet*, Professor Dan Svantesson provides a detailed and insightful account of what is emerging as the most crucial current issue in private international law; that is, how the Internet affects and is affected by the four fundamental questions: When should a lawsuit be entertained by the courts? Which state's law should be applied? When should a court that

can entertain a lawsuit decline to do so? And will a judgment rendered in one country be recognized and enforced in another? He identifies and investigates twelve characteristics of Internet communication that are relevant to these questions, and then proceeds with a detailed discussion of what is required of modern private international law rules. Professor Svantesson's approach focuses on several issues that have far-reaching practical consequences in the Internet context, including the following: • cross-border defamation; • cross-border business contracts; • cross-border consumer contracts; and • cross-border intellectual property issues. A wide survey of private international law solutions encompasses insightful and timely analyses of relevant laws adopted in a variety of countries including Australia, England, Hong Kong, the United States, Germany, Sweden, and China as well as in a range of international instruments. There is also a chapter on advances in geo-identification technology and its special value for legal practice. The book concludes with two model international conventions, one on cross-border defamation and one on cross-border contracts; as well as a set of practical check-lists to guide legal practitioners faced with cross-border matters within the discussed fields. Professor Svantesson's book brings together a wealth of research findings in the overlapping disciplines of law and technology that will be of particular utility to practitioners and academics working in this new and rapidly changing field. His thoughtful analysis of the interplay of the developing Internet and private international law will also be of great value, as will the tools he offers with which to anticipate the future. Private International Law and the Internet provides a remarkable stimulus to continue working towards globally acceptable rules on jurisdiction, applicable law, and recognition and enforcement of judgments for communication via the Internet.

Governing the Extractive Sector - Jeffrey Bone 2021-02-25

This book considers, and offers solutions to, the problems faced by local communities and the environment with respect to global mining. The author explores the idea of grievance mechanisms in the home states of the major mining conglomerates. These grievance mechanisms should be functional, pragmatic and effective at resolving disputes between mining

enterprises and impacted communities. The key to this provocative solution is twofold: the proposal harnesses the power of industry-sponsored dispute mechanisms to reduce the costs and other burdens on home state governments and judicial systems. Critically, civil society actors will be given a role as both advocates and mediators in order to achieve a fair result for those impacted abroad by extractive enterprises. Compelling, engaging and timely, this book presents an innovative approach for regulating the foreign conduct of the extractive sector.

Mediation and Commercial Contract Law - Maryam Salehijam
2020-12-11

There is an urgent need to better understand the legal issues pertaining to alternative dispute resolution (ADR), particularly in relation to mediation clauses. Despite the promotion of mediation by dispute resolution providers, policy makers, and judges, use of mediation remains low. In particular, problems arise when parties lack certainty regarding the legal effect of a mediation clause, and the potential uncertainty regarding the binding nature of agreements to pursue mediation is problematic and threatens the growth of ADR. This book closely examines the importance and complexity of mediation clauses in commercial contracts to remedy this persistent uncertainty. Using comparative law methods and detailed empirical research, it explores the creation of a comprehensive framework for the mediation clause. Providing valuable insight into the process of ADR and mediation, this book will be of interest to academics, law makers, law students, in-house council, lawyers, as well as parties interesting in drafting enforceable mediation clauses.

[A Digest of Cases, Overruled, Approved, Or Otherwise Dealt with in the English and Other Courts](#) - William Andrew George Woods 1907

Dynamic Business Law: The Essentials - Lucien Dhooge 2012-01-05

Dynamic Business Law: The Essentials is appropriate for the one-semester Business Law course. It contains the basics of business law but does not get bogged down in the kind of details that are more appropriate in an upper-level law class. The text provides an examination of the basic questions, concepts, and legal rules of business law. Emphasis on the BUSINESS in business law. Dynamic Business Law: The Essentials emphasizes the tie of legal issues back to the core business curriculum. This will help both students and faculty. Faculty need to know how this is integrated as they are constantly 'defending' the inclusion of this course in the business curriculum. And students need to understand how the concepts tie to their future business careers. Emphasis on TEACHING. Many professors teaching this course are attorneys first and academics second. They do not have a lot of time to prepare or think about how to apply this information effectively for their business students. Dynamic Business Law: The Essentials contains a helpful instructor's manual, particularly for the many adjuncts teaching this course. Emphasis on CRITICAL THINKING. Neil Browne, one of the co-authors of this text, has written a successful text on critical thinking. His framework is included in Dynamic Business Law: The Essentials as well - to help students learn how to frame and reframe a question/issue. Critical thinking questions are also included at the end of each case, to tie in this component even further.

Commercial Law and Commercial Practice - Sarah Worthington

2003-12-19

This edited collection brings together leading scholars and practitioners from various jurisdictions with essays and commentaries co-ordinated around the theme of alignments and misalignments between commercial law and commercial practice. The purpose of the book is to prompt a more critical and constructive reassessment of current commercial law and its practices, and to instigate a more fruitful dialogue between academics, judges, law reformers and practitioners. The result is a series of provocative and challenging essays addressing an enormous range of problems that are of intimate concern to commercial practice. Some essays focus on broad themes, such as globalization and trust. Others address more specific issues, such as contract interpretation or constraining modern management. Yet another group targets special problems, such as dematerialisation or super-priority, in order to assess the success of commercial law in meeting commercial demands. The depth and breadth of issues addressed is a credit to the authors. Taken as a whole, the volume makes some pointed suggestions for improving the practices and processes, and indeed the future progress, of commercial law.
